

Consistent SpellFixer

Are there multiple ways to spell a word in your language? Do you need to be able to standardize on a single form? Then Consistent SpellFixer (part of SILConverters) is a tool that can help you.

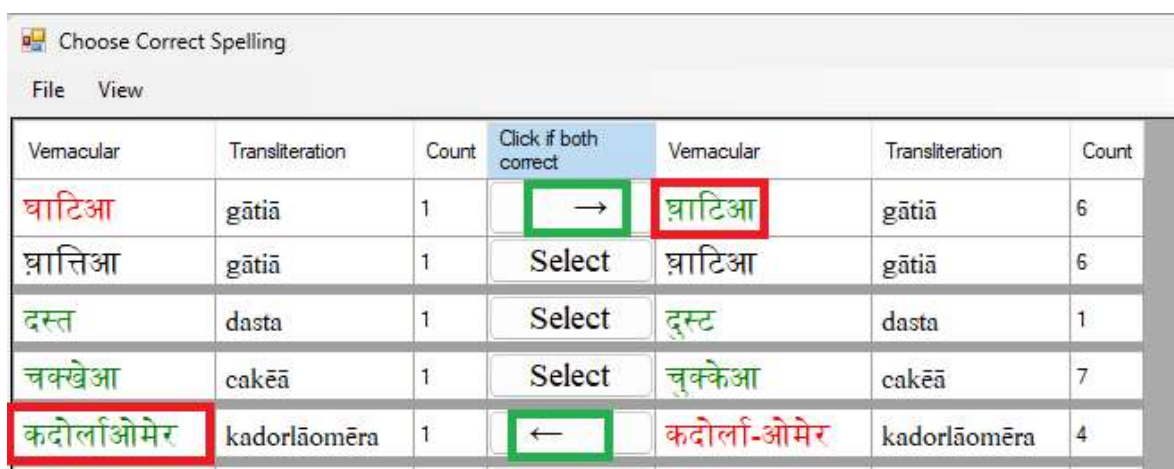

The tool will load your text corpus from SFM files (e.g. Paratext). Then it will show similarly spelled words in bundles like this:

Vernacular	Transliteration	Count	Click if both correct	Vernacular	Transliteration	Count
घाटिआ	misspelled word gātīā	1	Select	घाटिआ	same word gātīā	6
घात्तिआ	gātīā	1	Select	घाटिआ	gātīā	6
दस्त	dasta	1	Select	दुस्त	dasta	1
चक्खेआ	cakēā	1	Select	चुक्केआ	cakēā	7
कदोर्लाओमेर	kadorlāomēra	1	Select	कदोर्ला-ओमेर	kadorlāomēra	4
मितर	mitara	2	Select	मितर	mitara	4
मीटर	mitara	1	Select	मितर	mitara	4

Then you choose which spelling is the one you want to standardize on by clicking on the form you want (left- or right-hand side, OR both may be valid).

When you save the results, a Consistent Changes (CC) table will be created which you can use to process your corpus to make the spelling changes.

Vernacular	Transliteration	Count	Click if both correct	Vernacular	Transliteration	Count
घाटिआ	gātīā	1	→	घाटिआ	gātīā	6
घात्तिआ	gātīā	1	Select	घाटिआ	gātīā	6
दस्त	dasta	1	Select	दुस्त	dasta	1
चक्खेआ	cakēā	1	Select	चुक्केआ	cakēā	7
कदोर्लाओमेर	kadorlāomēra	1	←	कदोर्ला-ओमेर	kadorlāomēra	4
